ACADEMIC SERVICE

Teaching Assistant, Continuous Algorithm, 2025.

WORK EXPERIENCE

Mar 2024 – Present: EQUES Inc., Tokyo, Japan

Lead Engineer

- Led the development of a large language model (LLM) specialized for pharmaceutical and pharmacy applications
- Established coding standards and best practices for team collaborative development, enhancing the overall technical proficiency of the company

Sep 2023 – Present: Matsuo Institute Inc., Tokyo, Japan

Machine Learning Engineer

- Developed and evaluated 10+ machine learning and deep learning models for power demand forecasting
- Gained expertise in collaborative development practices, including continuous integration (CI) and rigorous code reviews

Dec 2022 – Present: Guild Labo Ltd., Tokyo, Japan

Engineer

- Developed a diffusion-based image generation model for anomaly detection applications.
- Build a unified web-based platform for coordinated control of multiple types of robots.
- Implemented and evaluated a reproduction of a BERT-based representation learning model for 3D modeling tasks.
